

# CONCEPTION OF A BABY GIRL

February 2024

My name is Natalia and my husband is Andrianos. We have been married for two years and suffered six miscarriages. I have an autoimmune disease which causes my body to attack the baby. We were told we would not conceive without the help of science and IVF. We decided to take a break from the doctors and testing, and leave it in God's hands.

In August of 2023, we had come to the Monastery to be blessed with the relics of Saint Nektarios by Fr. Stefanos, and two weeks later we found out we will be expecting a baby. Not long after, we heard a heartbeat for the very first time. We also found out that my disease had gone into remission and undetectable through bloodwork. Thanks to Saint Nektarios, we are expecting our sweet baby girl, Eleftheria Nektaria, May 2024. Thank you all for your prayers. We are eternally grateful.
