

HEALING OF BRAIN TUMOR

—The Testimony of Christos Kaznesiotis—

September 21, 2024

While in Greece during the summer of 2023, I developed double vision in my right eye. I was examined and it was determined that I had a tumor on the left side of my brain. The doctors recommended that I return to the United States immediately to begin treatment. I went to Memorial Sloan Kettering. Late in August I came to Saint Nektarios Monastery to be blessed with the relics, and I was also given holy oil from the vigil lamp of Saint Nektarios. The night before my surgery, September 7th, I prayed and then anointed the back of my head with holy oil from Saint Nektarios. At that moment, I felt a heat at that very spot which spread and travelled throughout my whole body, from top to bottom, and I got goosebumps.

The surgeon had told me I would need to remain in the hospital for approximately one week after the operation. Surgery was completed on September 8th around 12:00 pm. The following morning when the surgeon came to see me, he was surprised that I was so alert and looked well. I was not in pain. The surgeon called the physical therapist. When the therapist arrived, I got up and walked around, and after the therapist examined me, he told me that I was ready to go home, and they discharged me that same day.

I had also been told that they would remove the staples from the back of my head about a month after the surgery. However, when I went to see the surgeon for a follow-up two weeks later, the surgeon was surprised. Upon examining me, he said that the bones had completely fused together and the incision had closed, and he removed the staples that same day.

What is more, I returned to work two weeks after the surgery. They had told me that I would have to be out of work for a month or so. The incision line on the back of my skull was 4-6 inches long.

Additionally, I had been told that I would need to have five sessions of radiation therapy for some residual cancerous spots. Every night prior to the radiation therapy I would anoint myself, and each time I felt this heat going through my body, but not as intense as the first time.

A year later all the exams are coming clear. I feel good and continue to be blessed.
